

EPA Renovation, Repair, and Painting Initial Training Course

Common renovation activities like sanding, cutting, and demolition can create hazardous lead dust and chips by disturbing lead-based paint, which can be harmful to adults and children. To protect against this risk, in April 2008, EPA issued a rule requiring the use of lead-safe practices and other actions aimed at preventing lead poisoning. Under the rule, beginning in **April 2010**, contractors performing renovation, repair and painting (RRP) projects that disturb lead-based paint in homes, child care facilities, and schools built before 1978 must be **certified** and must follow specific work practices to prevent lead contamination.

The Professional Remodelers Organization, Inc.

- Date:** Three Dates to Choose From
Please check the class you would like to attend
- Friday, April 30, 2010
 - Tuesday, May 4, 2010
